MEMORANDUM FOR: Deputy Director (Support)

SUBJECT : Selected Items of Interest For Your Information

1. STENOWRITER-MT

Met yesterday with Ray Cline, Ting Sheldon, [redacted] 25X1
 Paul Borel, Joe LaRocque, Jay Bagnall, [redacted]
 The subject was IBM's "Stenowriter and Machine Translation" proposal which has been under intensive study by FDD/00 and ADPS (Project CHIVE). The meeting was very productive. Essence of the project is to use a special purpose computer to triple FDD's Russian translation output and yet keep it within its FY-64 fund allotment and T/O ceiling. Ray Cline was very favorably impressed with the idea and decided that he wanted to go ahead. The project (\$750,000) calls for the acquisition in 15 months of special purpose hardware to complement the computer facility now in Project CHIVE. As I mentioned to you once before, I think the Stenowriter application is apt to find usage elsewhere in the Agency.

2. OSA/DDR

25X1
 [redacted] | ADPS has had a series of direct inquiries from the DD/R about negotiating a priority acquisition of an IBM 7090 (\$60,000 a month) to support its scientific computation requirements. A memo to you is being drafted by Pete outlining the nature of his requirement and seeking this support from ADPS rather than establishing a separate facility for the DD/R. Pete has indicated his intent to go to the Director on this one if for some reason we are unprepared to grab the ball.

SECRET

~~SECRET~~3. NEW COMPUTER OFFICE

I am in the process of preparing a detailed paper for you outlining the financial and manpower requirements that will be needed if we establish an Office of Computing Services. It will enumerate all of the "pockets" of EAM and EDP activity in the Agency and should serve as a platform from which management can decide how far down the path of consolidation it wishes to go at this time.

4. DIA AUTOMATION

While you were away, DIA reorganized its automation facilities by centralizing them out at Arlington Hall. The plan calls for construction of a separate building at Arlington Hall to accommodate the hardware and the people affected by the DIA directive.

5. IBM INVITATION

You can expect a letter from Dr. Piore of IBM inviting you and senior members of the Agency to visit IBM's research facilities at Yorktown Heights. Because of a change in top management at Yorktown, Dr. Piore has been asking senior people from key Federal agencies in Washington to visit Yorktown and meet IBM's new top echelon.
